Grading Criteria

Aesthetics - Quality of overall design, graphics, colors, fonts, detail
Technical - Effective use of Flash and Actionscript
Animation - Smooth movements, flow, etc…
Communicative - Successfully and efficiently conveys a storyline
Creativity - Unique content, design style, animation technique, original graphics

Grading Scheme

A - Superior work, professional
B - Above average student work
C - Average student work
D - Below average student work
F - Failure

e out of 100. This will automatically update the total grade for each student to a percentage score out of 100 (see sa
so grade them with that in mind. Students should take this grading seriously, as the class average grade will factor
in the comment section for each project, being as detailed as possible. Submit the Excel spreadsheet when you ar

Comments
The movie worked well as a whole, but there was a lot of lag that was very distracting. Very little Actionscript, but t

ample student
into the
e done.
