GIF image (not animated) (list one and the page it is on)	helpicon.gif / help.html
Extrasite links	links.html
Email link	about/contactUs.html
Intra-document link	about/history.html
Form	about/contactUs.html
Above & Beyond	Location
Additional Content Pages	about/history.html about/vision.html

annualmeeting.html
annualreport.html
buildingsite.html
customize.html
demographics.html
links.html
newsletter.html
services.html
help.html
products/products.html
products/pricing.html
products/order.html

Use of JavaScript (list unique instances) All pages
I created javascript rollovers for my menu structure that are used on every content page.

Use of CSS formatting (list unique instances) project1.css
I assigned CSS formatting to paragraph tags and headings 1 through 6.

Other criteria I'd like to have considered (include location of items) I created a Flash logo that resides in the upper left corner of every page.
