

1. This site uses basic navigation on the left hand side. The frame layout all content but allows for scrolling without losing the menu.

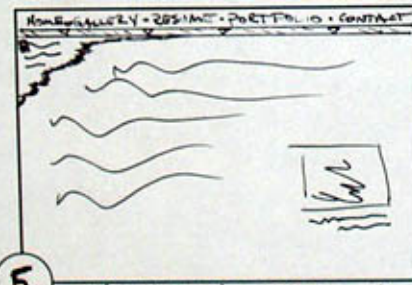

2. This site has the basic navigation at the top of the page. All content can be loaded within the frame.

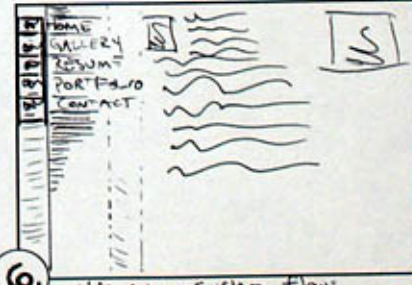

3. This site uses the menu bar at the bottom of the site very user friendly and easy to use.

4. This is something like the 1st one but the right side graphic has been subtracted. Also, the header has been removed.

5. This navigation system is at the top - with a smaller graphic/header below.

6. This menu system flows into content of page making more of a whole. The menu bar and header remain on the left.
